# CRIP CAMP

*Crip Camp* is the story of one group of people and captures one moment in time. There are hundreds, if not thousands, of other equally important stories from the Disability Rights Movement that have not yet received adequate attention. We are committed to using the film's platform to amplify additional narratives in the disability rights and disability justice communities – with a particular emphasis on stories surrounding people of color and other intersectionally marginalized communities. We stand by the creed of nothing about us, without us. For too long, too many were excluded, and it is time to broaden the number of voices and share the mic.
